## OFFICERS

President and Chairman of Executive Committee . . . . .	EDWARD S. FRENCH
Vice-President and Clerk of Corporation . . . . .	ARTHUR B. NICHOLS
Vice-President — Finance and Accounting . . . . .	W. S. TROWBRIDGE
Vice-President and General Manager . . . . .	J. W. SMITH
Vice-President — Purchases and Stores . . . . .	A. W. MUNSTER
Vice-President — Traffic . . . . .	J. W. RIMMER
Treasurer . . . . .	E. J. GALLAGHER
General Counsel . . . . .	A. P. MACKINNON
Chief Engineer . . . . .	W. F. CUMMINGS

Transfer Agent in Boston for all classes of stock, Old Colony Trust Company, 17 Court Street, Boston, Massachusetts.

Transfer Agent in New York for common stock, Guaranty Trust Company, 140 Broadway, New York City.

## BOSTON AND MAINE RAILROAD

The Annual Meeting of Stockholders of BOSTON AND MAINE RAILROAD will be held on Wednesday, April 12, 1939, at ten o'clock in the forenoon in the Directors Room, Boston and Maine Railroad General Offices, 150 Causeway Street, Boston, Massachusetts, for the following purposes:

- I. To hear and act upon the Report of the Directors.
- II. To fix the number of Directors and to elect Directors for the ensuing year.
- III. To take or authorize appropriate action concerning the making and performance of Equipment Trust Agreements for the purpose of obtaining additional rolling stock and/or other equipment and the issuance or assumption of obligations in connection therewith.
- IV. To take or authorize appropriate action concerning the borrowing of money which may be payable at periods of more or less than one year from the date of borrowing, the issuance of obligations to evidence such borrowings and the giving of collateral for such borrowings.
- V. To take or authorize appropriate action concerning (1) the issue of bonds under the mortgage from this corporation to Old Colony Trust Company et al, dated December 1, 1919, for any one or more of the purposes for which bonds may be issued under the provisions of said mortgage, (2) the issue of notes, debentures or bonds under and the execution of a collateral trust agreement to secure the same, and (3) the covenants, agreements and form relating to such obligations and to such collateral trust agreement, the issue of such obligations, the giving of additional security for such mortgage bonds and the giving of any security for the collateral trust obligations, and the terms, manner of sale, pledging or other disposition of any obligations authorized to be issued.
- VI. To take or authorize appropriate action concerning applications to the Interstate Commerce Commission, Reconstruction Finance Corporation and other governmental agencies in relation to the subject matter in any of the articles in this call or any orders, decrees or other action thereon.
- VII. To take or authorize appropriate action concerning a modification of the Agreement dated October 6, 1932, for the maintenance and operation of the Concord & Portsmouth Railroad made necessary by a proposed relocation of the last named railroad in Portsmouth, New Hampshire.
- VIII. To take or authorize action incidental to any of the foregoing articles or on any other matter that may properly come before the meeting.

By order of the Directors,

ARTHUR B. NICHOLS, *Clerk.*

Boston, Massachusetts  
February 28, 1939.

The Board of Directors earnestly hopes you will find it convenient to be present at the above meeting or if that is not possible, that you will arrange for a representative to vote your stock.

To the Stockholders of Boston and Maine Railroad:

On behalf of the Board of Directors there is submitted herewith the report for the year ended December 31, 1938.

### INCOME ACCOUNT — CONDENSED

	1938	Increase or Decrease	Per Cent
Operating Revenue.....	\$40,193,026 27	D \$6,179,666 74	13.33

D Indicates decrease.

### CAPITAL STOCK

The number of shares of Capital Stock of all classes outstanding December 31, 1938, including full-paid negotiable receipts for subscriptions to Prior Preference Stock, was 1,046,113 shares, of a par value of \$104,611,300.

Beginning January 1, 1934, and until January 1, 1940, holders of this Company's bonds of Series Q to GG, inclusive, have the right to exchange such bonds without limit for Prior Preference stock, dollar for dollar, in amounts of \$500 and multiples thereof.

### CHANGES IN FUNDED DEBT

Funded Debt on December 31, 1938, amounted to \$149,316,916.49, a decrease of \$2,077,641.93 since December 31, 1937. Of the total Funded Debt, \$33,169,000.00 is owned by the Railroad, leaving a balance of \$116,147,916.49 outstanding in the hands of the public.

#### New Issues:

Contract—General Motors Accept. Corporation.....	\$202,500 00
Contract—A. C. F. Motors.....	63,984 00
Contract—Yellow Mfg. Co.....	19,615 15
Contract—New York State E. G. C. Valley Falls.....	43,175 30
Contract—New York State E. G. C. Hoosic Falls.....	28,349 89

Total Increase..... \$357,624 34

#### Matured Funded Debt Paid Off:

B. & M. R.R. Series N. N. 3% Bonds paid Jan. 1.....	\$200,000 00

Contract—New York State E. G. C. Rotterdam, N. Y.....	55 52

Total Decrease..... \$2,435,266 27

Net Decrease as above..... \$2,077,641 93

#### FEDERAL VALUATION

By an order of the Interstate Commerce Commission dated July 12, 1930, received February 13, 1931, the final value for rate-making purposes of the Boston and Maine System (excluding the St. Johnsbury & Lake Champlain Railroad and the Montpelier & Wells River Railroad) is fixed at \$230,897,118 as of June 30, 1914. This value brought up to date by adding the net Additions and Betterments since June 30, 1914, makes the value December 31, 1938, \$299,598,069. This does not include value of non-carrier property.

#### PASSENGER REVENUES

Passenger revenues decreased \$462,114.91 or 6.16% below 1937 but were larger than for any other year since 1932. Several circumstances affected the results. In the early part of the year, unusually light snowfall curtailed the operation of special winter sports service. The failure of the general business revival, which was felt in increasing degree as the year went on, materially affected passenger travel. A decision of the Interstate Commerce Commission in Ex Parte 123 authorized a maximum one-way coach fare of 2½¢ per mile instead of 2¢ on railroads in the eastern territory, the increase becoming effective on July 25th. At the same time, this company established a consecutive three day round trip fare of 2¢ per mile to meet the short haul competition in our territory but it is impossible to measure accurately the effect of these changes in rates. In the latter part of September the disastrous flood and hurricane (the effects of which are referred to elsewhere in this report) caused a disruption of service which was not wholly overcome for many weeks.

Milk revenues decreased \$137,662.52 or 11.24% below 1937. To a considerable degree, loss of revenue occurred because of decreased consumption which inevitably occurs along with depressed economic and employment conditions, and

the substitution of milk distributed free as "welfare" milk for milk ordinarily sold by our patrons to consumers displaced some milk traffic from the rails.

Present indications are for a stabilization of marketing conditions which had threatened to become disorganized. Close attention is being devoted to the requirements of this class of traffic.

### FREIGHT REVENUES

The recession in business, beginning in the late summer of 1937 and continuing throughout the first eight months of 1938, was reflected in our revenues in each of those months. Commencing with October, there was an improvement in general business conditions, and this resulted in a somewhat more favorable showing in the latter months of the year.

On March 8, 1938, the Interstate Commerce Commission handed down its decision on the application of the railroads throughout the country for a 15% increase in freight rates (Ex Parte 123). The increase sought was not granted in full, but authority was given by the Commission for a general increase of ten per cent with certain exceptions. An increase of five per cent was allowed on such commodities as agricultural products, animals and products of animals, lumber, etc., with a similar increase in import rates. An increase of 10¢ per net ton was authorized on anthracite coal, with no increase on bituminous coal rates beyond those allowed under Ex Parte 115 in November, 1937. At the time these higher rates became effective, it was estimated that an increase in our revenue of about \$2,000,000 a year might be expected.

Tariffs were filed with the Commission by the Boston and Maine and various other Eastern carriers, effective as of August 15th, setting up a small charge, over and above the regular station-to-station freight rate, for pick-up and delivery service when this service is requested by shippers or receivers. Previous to that date, or since its inauguration in 1932, no such charge had been assessed.

### INDUSTRIAL DEVELOPMENT

While business conditions during most of the year were not favorable to industrial development, progress has been made in securing new industries in Boston and Maine territory. A number of buildings which had been vacant for several years have been purchased or rented on long term leases for manufacturing or warehousing purposes, producing in the aggregate a substantial amount of new business for the Railroad.

During the last quarter of the year there was a noticeable revival of interest in industrial development or expansion and several important projects are under consideration which, it is hoped, will be consummated in 1939.

### TAXES

Reference was made in the 1937 Report to the Railroad Retirement Act of 1937 and the Carriers' Taxing Act of 1937 which became law in June, 1937, effective January 1, 1937. There was no change during 1938 in the law and taxes were assessed against employer and employee at the rate of 2¾% on the first \$300 of each employee's monthly earnings. Taxes against the Railroad under this act were \$587,581.79. Up to December 31, 1938, the Railroad Retirement Board, created to administer the act, had granted annuities to a total of 1,714 Boston and Maine employees, and in addition had taken over under the provisions of the Retirement Act 570 former employees who had been receiving pension allowances from the Railroad.

The Social Security Act, referred to in previous reports, during the year 1938 taxed the carriers at the rate of 3% of the total 1938 payroll, an increase of 1% over the previous year. The tax levied for this purpose was \$654,533.03.

On June 25, 1938, an Act of Congress established an unemployment insurance system for individuals employed by certain employers engaged in interstate commerce. This new law becomes effective July 1, 1939, and the provisions of the Social Security Act formerly administered by the individual states will be taken from their jurisdiction and administered by the Railroad Retirement Board, the rate of taxation remaining the same.

### OPERATING RESULTS

The September floods and hurricane caused losses in revenue and increases in operating expenses which so distort the 1938 figures that comparisons of the year's operations with those of previous years generally have little value.

Between September 20th and October 23rd freight was detoured over various routes. The detour from Mechanicville via Rouses Point, Montreal and Portland to Boston was continued until October 1st when the Fitchburg Division west of Greenfield was opened up and the bulk of the traffic routed from Mechanicville via Greenfield to White River Junction and thence to Boston. Some of this traffic was detoured from Bellows Falls over the Cheshire Branch to South Ashburnham, as well as over the Boston & Albany Railroad from Springfield, until October 23rd when operation on the Fitchburg Division was resumed east of Greenfield.

The primary index of efficiency in freight train operation is gross ton miles per train hour and the year 1937 produced an all-time high for this factor — 26,675. In 1938, notwithstanding the substantial shrinkage of 13.1% in volume of freight traffic, the gross ton miles per train hour were only 4.3% less than in the record year.

The consumption of locomotive fuel per 1,000 gross ton miles was 0.4% less in 1938 than in 1937. This result was produced through close supervision of purchases and use of fuel and the benefits should be even more marked in a period of increasing traffic.

Another efficiency index that has not been stressed previously is the ever increasing average miles per serviceable locomotive day. During the year 1932 this figure for freight locomotives was 71.9 miles; this increased in 1938 to 90.8 miles or 26.3%. Roughly this means that 80 freight locomotives will now do the work for which 100 locomotives were required seven years ago.

In passenger service in 1932 the mileage per serviceable locomotive day was 108.3 and this has progressively increased to 117.7 miles in 1938 or about 9%.

### FLOOD AND HURRICANE DAMAGE

On September 21st winds of hurricane velocity caused serious damage to railroad property. Fallen poles, wires, trees and parts of structures temporarily blocked practically all lines. Railroad power, signal and communication lines sustained extensive damage. Heavy building damage occurred to shops at Concord, N. H., dock properties at Boston, Mass., and engine houses at various points including those at Stoneham and Bedford, Mass., which were completely demolished. Many crossing gates and signals were blown down.

Extensive flood damage occurred on lines of the Fitchburg and New Hampshire Divisions, with lesser damage on the Portland and Terminal Divisions. Records show damage sustained at more than 300 separate locations. 27 bridges or culverts were destroyed or damaged. There were 206 major wash-

# BOSTON AND MAINE RAILROAD

## YEAR 1938

### DISPOSITION OF THE RAILROAD DOLLAR

SHADED AREA YEAR 1937

outs, 22 landslides and 45 submerged locations. The main line of the Fitchburg Division between Gardner and North Adams, Mass., suffered severely. 5 major bridges were badly damaged, 3 of which required complete rebuilding. At the major washout near Millers Falls, Mass., the river changed its course and washed out the roadbed and track a distance of 1,400 feet to a depth of 30 feet. Several landslides, two of which were of major proportions, occurred near Zoar, Mass., one derailing a passing freight train.

A maximum of 977 miles of road were closed to operation including 593 miles of main lines. Restoration was progressed rapidly with the result that 672 miles of line were restored in 7 days and 816 miles in 15 days. Of the main line mileage affected, 71% was restored on the 4th day and 97% had been restored on the 15th day. The main line of the Fitchburg Division was reopened on October 23rd. Restoration of the branch lines continued progressively and all mileage scheduled for restoration, upon which authority to repair had been granted, was reopened by December 7th. About 25 miles of line is being studied for abandonment.

The work of restoration involved the employment of approximately 3,000 men, including 1,500 extra men and through December 31st had aggregated 1,407,000 man hours. 40 units of major work equipment were used and 1,645 work train days were operated. Materials used for filling and riprap through the end of the year totalled 16,884 cars, — 12,723 cars of gravel and cinders, containing 425,723 cubic yards and 4,161 cars of riprap and ballast stone totalling 182,413 tons.

Reconstruction and rebuilding of bridges and structures and placement of riprap to protect embankments is progressing through the winter months.

The total out-of-pocket cost of this disaster was \$2,252,746.42 of which \$1,751,609.40 was charged against 1938 income and \$501,137.02 is chargeable to Capital account.

### ADDITIONS AND BETTERMENTS

On account of low revenues attendant upon the general business situation, addition and betterment work has been restricted to those expenditures necessary for safe operation, to furnish adequate service or to provide facilities which indicate substantial economies in operation.

One grade crossing at Willey, N. H., has been closed and Federal Works projects have eliminated grade crossings by the substitution of overhead bridges at Newbury, Vt., and at Bridgewater, N. H.

Other Federal projects installed automatic signals at 2 crossings and the Railroad installed signals at 3 other crossings and placed additional lights on existing flashing signals at 3 crossings. Hurricane damage resulted in the replacement of 8 old type crossing signals with modern signals.

A very considerable number of oil-burning switch heaters, for protection of switches against snow accumulation, and one hydrocarbon snow melting station were installed.

Other United States Works projects have included the rebuilding of a track bridge over a highway at Swampscott, Mass., and of overhead highway bridges at Danbury, N. H., and North Kennebunkport, Me. One bridge at Revere, Mass., was rebuilt at the expense of the municipality. One bridge at Clinton Jet., Mass., was rebuilt by the Railroad and 5 other bridges and 7 culverts at various points were reconstructed as a part of our maintenance program.

Electric approach block signal lighting was completed between Fitchburg and Hoosac Tunnel, Mass., and other less extensive signal changes were made at various points.

Among miscellaneous improvements to facilities for better handling of traffic were the installation of a crane at Rockport, Mass., to handle heavy ship-

ments, and the construction of a warm-room at Mystic Docks in Boston for the protection of perishable shipments moving by rail and water.

Automatic stokers have been provided in the power plants at Billerica, Mass., and Mechanicville, N. Y.

A new passenger station was constructed on the northeast side of the main line at Cambridge, Mass. The old station on the opposite side of the main line, together with the land on which it stood, was sold at a satisfactory price. The change in location of the station appears to have had a stimulating effect on the volume of travel handled at that point.

---

The construction of a joint railroad and highway toll bridge across the Piscataqua River at Portsmouth, N. H., is under way. The Legislatures of Maine and New Hampshire have set up The Maine-New Hampshire Interstate Bridge Authority with the approval of Congress to build and operate this structure with highway approaches. An agreement between the Railroad and the Authority provides for railroad use of the bridge on an annual rental basis.

From the standpoint of this company, the bridge is important as it replaces a railroad wooden structure of high maintenance cost which has been a deterrent to development of the Piscataqua River. The Railroad's interest in the matter is not limited to its actual use of the new bridge, but is also concerned with industrial development of this area where deep water, reasonably priced land and excellent rail facilities exist.

---

Your management has been active during the past year, in cooperation with the Association of American Railroads, in presenting to the people in its territory, through the medium of public addresses by its officers, exhibitions of moving pictures and Vocafilm slides and through well-considered publicity, the various problems — both national and local — which confront the railroad industry.

Through the medium of meetings and carefully prepared printed matter a series of discussions for the interchange of ideas has been and is being held with employees having contact with the general public, to the end that those using our facilities shall be courteously and efficiently served.

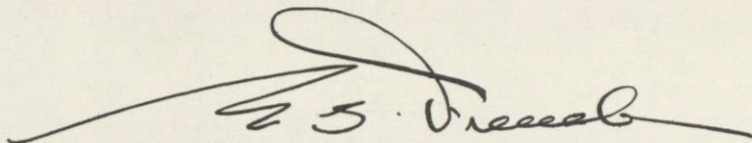

---

The Directors record, with deep regret, the death on April 13, 1938, of their fellow member, Frank P. Carpenter, of Manchester, N. H. Elected to the Board on October 8, 1913, he had served continuously for nearly a quarter of a century, and during that time his sound judgment, long experience, wide acquaintance and business connections were of great value to your company.

---

The Board makes grateful acknowledgment to shippers and passengers of the goodwill they have evidenced throughout the year, and expresses to the company's officers and employees its appreciation of their continued loyalty, diligence and efficiency.

By order of the Board of Directors,

A large, stylized handwritten signature in dark ink, likely belonging to the President of the company.

President.

February 28, 1939.
